

### Investment Objective & Process

The objective of the 8AM AQ Classic 7 is to deliver long term capital growth with a highest medium attitude to risk as defined by Dynamic Planner, by investing in a diversified range of asset types.

In addition, the aim of the 8AM AQ MPS is to deliver consistent outperformance of industry benchmarks, within pre-defined risk parameters. Our quantitative fund screening helps to identify managers delivering outperformance and holds these positions until relative performance declines or a superior choice becomes available. Longer-term strategic asset allocation is set based on stochastic analysis delivered by Dynamic Planner whilst the 8AM investment team provides tactical oversight.

This investment process is augmented by independent and repeated risk review provided by Dynamic Planner.
