

Investment Objective & Process

The objective of the 8AM AQ Global 80 portfolio is to deliver long term capital growth via fixed exposure to 80% global equities.

In addition, the aim of the 8AM AQ MPS is to deliver consistent outperformance of industry benchmarks, within pre-defined risk parameters. Our quantitative fund screening helps to identify managers delivering outperformance and holds these positions until relative performance declines or a superior choice becomes available.

Long-term strategic asset allocation is set based on MSCI AWCI weights whilst the 8AM Investment Team provides tactical sector tilts utilising large samples of the position of peer multi-asset strategies.
